Projects in Moving Image & Sound Archiving

Office Hours: Thursdays 3:00 – 6:00p, and by appointment
Credits: 3
Prerequisites: LIS 654 (Information Technologies), or by permission
Recommend: LIS 694 (Film and Media Collections)
Location: PMC 611

Bulletin Description:

Covers current issues and topics. New or experimental courses are taught several times to assess the need for them in the regular curriculum.

Detailed Description:

From film, video, to born digital, moving image and sound recordings have compelled users since their advent in the late nineteenth century. Today, many archives housed at universities or non-profit institutions...
act to preserve the moving image record. However, the fragility of this medium (particularly the magnetic medium that holds sound and video), combined with the preservation needs of today’s born-digital works (such as independent documentaries), are questioning our collective ability to preserve this work. This class will work to combat this trend by focusing on the theoretical and practical aspects related to archiving moving image and sound recording, with a particular focus on digitization and born-digital assets.

Course Goals:

- Familiarize students with the current discourses in the area of moving image and sound archiving, including theoretical and practical aspects.
- Introduce students to the digitization of moving image and sound content, and the handling of materials that are born digital.
- Learn about metadata and standards used in digital archive creation, as well as digital infrastructure.
- Anticipate managing digital archives in a time of technical change, including issues related in archiving the web, managing digital rights, and preserving digital content.

Student Learning Objectives:

- Students will become familiar with the technical dimensions related to digitally archiving moving image and sound assets.
- Students will be able to digitize (select) analog material into digital form in a variety of moving image and sound formats.
- Students will be able to create metadata appropriate for moving image and sound content.
- Students will be able to identify rights issues (legal, ethical, moral) with digitized materials.
- Students will be able to work with a team to implement a small moving image or sound digital archive using open source software.

Course Schedule and Readings

8/29 - Introduction

- Overview of Syllabus and Projects
- Post a photo of yourself and fill-out your profile on the LMS [http://lms.pratt.edu](http://lms.pratt.edu)

9/5 – Film: A Recently Obsolete Technology?

Screening at the Quad: *Side by Side: The Science, Art, and Impact of Digital Cinema*

Further Reading:

9/12 – The Digital Dilemma: Preserving Moving Images through Digital files

Further Reading:

FIAF – International Federation of Film Archives: FIAF e-Publications: http://www.fiafnet.org/uk/publications/fep.html

9/19 – Emerging Technology and Moving Image Archiving: Tensions and Opportunities

9/26 – Video & Television

Further Reading:

On specific video carriers:

High Definition - http://en.wikipedia.org/wiki/High-definition_video

10/3 - Video: Cases of Video Migrations

Further Reading:

Independent Media Arts Preservation - [http://www.imappreserve.org/](http://www.imappreserve.org/)

10/10 – Sound Archiving: Digital Preservation

Further Reading:

10/17 - Sound Archiving: Oral History and Sound in Historic Preservation

Further Reading:

Association of Cultural Equity (Alan Lomax Archive) - [http://www.culturalequity.org/](http://www.culturalequity.org/)

10/24 – Moving Image Metadata

Design Project Proposal Due.

Further Reading:

10/31 – Moving Image File Formats

Further Reading:

11/7 - Film Preservation

Further Reading:

11/14 - Digital Rights Management

Further Reading:

11/21 – No Class; Thanksgiving Holiday

11/28 - Cases in Archiving Born Digital Moving Image Assets

*Digital Television:*

*Digital Cinema:*

Further Reading:

Archive Team - http://www.archiveteam.org/

12/5 – The Digital Dilemma II: Experiences from Independent Filmmakers

12/12 – Design Project Presentations

Textbooks, Readings, and Materials

No textbook is required for this course. All readings are available online via the LMS (http://lms.pratt.edu).

Course Requirements

Students’ course grades will be determined by performance on the following activities:

1. Class Participation (20%)
2. Digital Archive Creation Project (35%)
3. Design Project (35%)
   3a. Proposal (2-5 pages) (5%) – due October 24
   3b. Design Document (5-10 pages) (20%) - due December 12, last day of class
   3c. Presentation (10%) – present on December 12, last day of class
4. Self-assessment (10%) – due December 12, last day of class

Class Participation
Students are expected to be prepared and to contribute to class discussions each week with scholarly analyses and insights. In addition, each week one student or a team of two students will present their understanding of the readings to the class. This is an opportunity to consolidate your (or your team’s) understanding on a topic, to present your perspective, to make novel connections to other domains, and to relate the readings to real-world experience. Presenters should be prepared to make around a 10-15-minute presentation, and conclude with some questions or issues they would like to discuss more thoroughly.

The schedule of presenters will be decided on the first day of class.

**Digital Archive Creation Project (DACP)**

The objective of the Projects in Moving Image and Sound Archiving course is to provide students with the theoretical, practical and hands-on experience in digital archive creation. In order to provide the most relevant and realistic learning experience for students, students will digitize an actual archival collection and develop the means of access to that collection through creating a web-presence.

This semester, we will be working to advance two digital archives: one sound-based, and one video-based.

**Video-based Project**

This semester, we will be working with The Archives of the American Field Service and AFS Intercultural Programs (aka AFS Archives). AFS can trace its origins to 1914 shortly after the outbreak of World War I, when young Americans living in Paris volunteered as ambulance drivers at the American Hospital of Paris. During the Second World War, AFS ambulance drivers were one of the earliest responders to the Nazi concentration camps. More information on the AFS Archives can be found here: [http://www.afs.org/afs-history-and-archives/about-the-archives/archival-collections/](http://www.afs.org/afs-history-and-archives/about-the-archives/archival-collections/).

We will be working to digitize a collection of oral histories available on VHS from WWII ambulance drivers recorded during the later half of the 20th century. In order to digitize the materials, each student will be responsible for digitizing approximately a few tapes. In addition to students digitizing a few tapes, students will be placed in groups based on interests to carrying-out the project:

**Sound-based Project**

We will be working with dance critic Barbara Newman to complete and enhance an oral history archive around dance. Ms. Newman has interviewed dance choreographers, company directors, master teachers, among others, and has published these interviews in her books (e.g., *Grace Under Pressure: Passing Dance Through Time* (Limelight, 2004)) and in periodicals like *Dancing Times* of the UK [http://www.dancing-times.co.uk/](http://www.dancing-times.co.uk/). Many of the interviews have survived on audio cassette and mini-disc. Specifically, we will be creating a digital archive of the recorded interviews that went into creating her first book, *Striking a Balance: Dancers Talk About Dancing* (Houghton Mifflin, 1982). This archive includes interviews
from notable members of the dance community such as Peter Martins (Ballet Master in Chief, NYC Ballet), Tanaquil LeClercq (wife of George Balanchine and NYC Ballet), and Moira Shearer (The Red Shoes). This project was begun in Spring 2012, and is available at http://striking.prattsils.org. In engaging with this project, we will consider the more substantive issues of how to archive dance in the digital era, a form of performance particularly prone to loss.

Student will join groups based on interests within the following functional areas:

- **Research and Collection Development**: Research the cutting edge in digital archiving; bring ideas and research to enrich the collection; providing any auxiliary materials (photos, etc.) that could augment the experience.
- **Metadata**: Develop a metadata plan; import digital materials into the CMS
- **Technology**: Responsible for setting-up and installing the Content Management System, working with the design team to integrate the design.
- **Design**: Responsible for designing the look and feel of the site (graphics, colors, user experience, usability).

More information on this project will be made available as the course progresses.

**Design Project**

**Overview**

Each day, the web expands with new videos, trailers, web pages, tweets, status updates, files, links, among many other types of contributions. With the deluge of new information, a challenge associated with contributing any digital material to the web is making it meaningful to users. Relatedly, what constitutes a “digital archive” is continually evolving (e.g., Twitter is now archived at the Library of Congress). Your challenge is to design your “ideal” project, tool, or program that you think points to the future of moving image and sound archiving. Unlike the archives we will be creating for the AFS or Barbara Newman, this project is more about designing—not fully implementing—some moving image and sound digital archiving idea you are interested in. You should consider the ways in which your project, tool or program makes the content interesting, relevant or useful to new or existing users.

The class will be divided into design groups with around four members (same group as the DACP). Time will be provided in class for groups to meet; however, meeting out of class time may be required. Each group will be expected to deliver a project proposal, a project design document, and a presentation on the last day of class. Details on these aspects are below:

**Proposal**

The Proposal should be 2-5 pages and outline the idea for your project. The proposal should be considered a less fully-fleshed-out version of the project design document (see below). The instructor will provide feedback on the proposal which you can use in further refining your project.

**Design Document**

The project design document should be 10-15 pages, and can include figures and diagrams. This document should take the form of a traditional document (hence, it should not be a Powerpoint or in a presentation form). The design document should address:

a) What is the purpose of your project?
1) Why do we need it?
2) What materials will you use for this project?
3) What educational or learning goals will motivate this effort, if any?
4) What populations of users (if any) will be served?
5) What type of community (if any) will be fostered by this effort?
6) What role (if any) will librarians or archivists play in this project?
7) What will be the size of this effort?
8) How will the project be assessed?
9) Does it make use of moving image and sound assets, and how?

b) What are the features and functions of the project? Please be specific.

c) Implementation: What do you think would be involved to make this design a reality? Provide estimations.

d) What does the literature and research on digital archives offer in thinking about this project?

**Presentation**

Each group will get 15 minutes to present, and a 5 minute question and answer period. Each group should:

a) Make it fun and educational! Be creative! We have all been subject to ill-prepared or low-energy presentations- avoid it!

b) Discuss the goals, why your project is needed, and what makes your project innovative.

c) Provide a way of demonstrating your design to the class. These may include electronic illustrations (Powerpoint), an interactive simulation, or large paper/drawing presentations. You may also want to consider handouts for the class.

**E-Portfolio**

Starting Fall 2012, all students entering the MSLIS degree program are required to complete an e-portfolio that must be approved by their advisor before they will be permitted to graduate. The e-Portfolio provides students with an opportunity to showcase their best work from the courses they have taken at SILS, and an opportunity to demonstrate they have met the learning objectives of a Master of Information and Library Science.

Work completed for this course may be included in the e-portfolio. Students must demonstrate that their work fulfills at least one of the following learning outcomes:

1. Students carry-out and apply research
2. Students demonstrate excellent communication skills and create and convey content
3. Students use information technology and digital tools effectively
4. Students apply concepts related to use and users of information and user needs and perspectives
5. Students perform within the framework of professional practice

Detailed information on the learning outcomes, requirements and how to create your e-portfolio is available from: [http://www.pratt.edu/academics/information_and_library_sciences/about_sils/sils_eportfolio/](http://www.pratt.edu/academics/information_and_library_sciences/about_sils/sils_eportfolio/)

**Assessment and Evaluation**

1. All assignments must completed in order to receive a passing grade in the course
2. Assignments must be turned in during class in hard copy (except for the weekly responses which should be completed on The LMS). Late assignments will receive a reduced grade
4. Late papers will receive a grade but no comments
5. Pratt policy: Students with extensive absences (three or more for any reason) will be required to drop the course.

Pratt’s grading scale:

Superior work: A 4.0 (96-100)  A- 3.7 (90-95)
Very good work: B+ 3.3 (87-89)  B 3.0 (83-86)  B- 2.7 (80-82)
Marginally satisfactory: C+ 2.3 (77-79)  C 2.0
Failed: F 0.0 (0-69)

Policies

All Institute-wide policies are listed in the Bulletin under “Community Standards,” which include policies on attendance, academic integrity, plagiarism, computer, and network use. Students who require special accommodations for disabilities must obtain clearance from the Office of Disability Services at the beginning of the semester. They should contact Mai McDonald, Disability Services Coordinator, in the Office of the Vice President for Student Affairs, Main Building, Lower Level: 718-636-3711.
