LIS 665-01: Projects in Digital Archives
Spring 2013

Class Hours: Mondays 3:30 – 5:50p
Office Hours: Mondays 1:00-3:00p, Tuesdays 2:00-3:00pm, and by appointment
Credits: 3
Prerequisites: LIS 654 (Information Technologies), or by permission
Location: PMC 611

Bulletin Description:

This class is a combination of theoretical, practical and hands-on approaches to digital library creation. Topics will include metadata creation, image capture, archival storage and Web presentation. Students will learn about the theories behind the practices that they will implement, and will gain an understanding about the administrative issues associated with the successful implementation of a digitization project.

Detailed Description:

This course provides an opportunity for students to learn how to create a digital archive, and practice the implementation of such a digital archive with a partner institution. Additionally, students have the opportunity to exercise their creativity in the design of a tool, program, or project that makes use of digital archives for educational or social purposes.

Course Goals:

- Familiarize students with the current discourses in the area of digital archives, including theoretical and practical aspects.
- Introduce students to the digitization of audio and visual materials, and the handling of materials that are born digital.
- Learn about metadata and standards used in digital archive creation, as well as digital infrastructure.
- Anticipate managing digital archives in a time of technical change, including issues related in archiving the web, managing digital rights, and preserving digital content.

Student Learning Objectives:

- Students will be able to digitize analog material into digital form.
- Students will be able to create metadata for a digital archive.
- Students will be able to identify rights issues (legal, ethical, moral) with digitized materials.
- Students will be able to work with a team to design a digital archive using knowledge of information architecture and usability.
- Students will be able to work with a team to implement a digital archive for a small institution using open source software.

Subject to change based on student interest. Please refer to the LMS for updates: http://lms.pratt.edu
Course Schedule and Readings

1/14 – Introduction

- Overview of Syllabus and Projects
- Assign weekly presenters of class readings
- Post a photo of yourself and fill-out your profile on the LMS
- Sign-up for the Society of American Archivists (SAA) Listserv (do not have to be a dues-paying member)
  
  http://www2.archivists.org/listserv

1/21 – No Class; MLK Holiday

1/28 – Doing Digital Archiving: The Practice of and its Challenges

Further Reading:

Reflection Questions:

Gilliland-Swetland (2000) discusses the use of the “archival perspective” in thinking through the movement of resources to the digital information environment. What is the “archival perspective,” and how is it useful (or not) in thinking about the digital information environment?

2/4 – Archiving Audio

Further Reading:

Association for Recorded Sound Collections: http://www.arsc-audio.org/
International Association of Sound and Audiovisual Archives: http://www.iasa-web.org/
FACET: http://www.dlib.indiana.edu/projects/sounddirections/facet/index.shtml
Oral History Association: http://www.oralhistory.org/
Step-by-Step Guide to Oral History: http://dohistory.org/on_your_own/toolkit/oralHistory.html#DOIT

Reflection Questions:

Schulman discusses her rationale for archiving audio. What is her rationale?

When working with digital archives, it is common to ask the question, “how much space will we need to save all this material?” For the Dance project, approximately how much space will we need just to store the audio (ignoring other data such as meta-data)? We know that we have 6 mini discs, and those could run as long as 80 minutes. However, how long would an interview ideally take? 30 minutes? 40 minutes? How could you find out without listening to every disc? Assume if we used 16-bit/44.1 kHz stereo audio and create uncompressed files, what is the low-end and the high-end of disk space we would need?

2/11 – Managing Digital Collections

Further Reading:

http://framework.niso.org/node/7
http://framework.niso.org/node/8
http://framework.niso.org/node/18

Archivists Toolkit: http://www.archiviststoolkit.org/

Digitization 101: http://hurstassociates.blogspot.com/

Digitization in the Real World: http://metroblogs.typepad.com/ditrw/

**Reflection Questions:**

Very quickly, the world has moved from the intellectual production of physical stuff (hand-written manuscripts, typewritten manuscripts, print-outs, etc.) to one of virtual objects (e.g., MS Word document that may never be printed out, a shared Google document, etc.). The challenge for archives is to try to create a primary source record, when all the tools of the trade and ways of doing things are changing and/or need to be changed. How do we create a primary source record in this environment, and how are people in the field responding to this challenge? How would you respond to it?

**2/18 – Digital Infrastructure: Content Management Systems**

**Further Reading:**

Archon - http://www.archon.org/

Duraspace - http://duraspace.org/

Omeka - http://omeka.org/

CollectiveAccess – http://collectiveaccess.org

Greenstone – http://greenstone.org

ContentDM – http://www.contentdm.org/

(Example Omeka site) Digital Amherst - http://www.digitalamherst.org/

(Example Omeka site) digitalMETRO - http://nycdigital.org/

Parallel Archive - http://www.parallelarchive.org/

**Reflection Questions:**

This week we will be discussing content management systems (CMS). CMS are used for storing and publishing digital content, which can be documents, video, audio, etc. Do you have any experience working with any of the CMS mentioned in the two articles. For example, have you used WordPress to create a blog?

**Storage:**

**Databases:**

**Networks:**

**Cloud Computing:**

**Further Reading:**

Reflection Questions:

This week’s readings and videos discuss the core infrastructure of digital archives: storage, databases, networks and cloud computing. Most (if not all) digital archives make extensive use of these components. Of these four discussion topics, which do you feel the most comfortable with? For example, have you ever created or used a relational database (MySQL, Microsoft Access, Oracle)? If so, describe the project and how you used a relational database. How comfortable are you with your understanding of how the Internet works (or other networks such as Ethernet)? How comfortable are you with your understanding of data storage and some of the related concepts, such as RAID? Which component(s) would you like to discuss more fully in this class section?

3/4 - Designing Digital Interfaces: Information Architecture, Usability, and Design Considerations

Further Reading:

Reflection Questions:

This week we will be discussing user interfaces to digital archives. A variety of approaches are discussed in the readings with respect to designing a user interface, from a Web 2.0 approach (Cocciolo, 2010) to one specific to designing a historical website (Cohen & Rosenzweig, 2005). Discuss the readings and a user interface that you love OR hate. Why does it provoke such feelings of love or hate? How did your feelings about it change (or not) after using it for a period of time?

3/11 – No Class; Spring Break

3/18 - Metadata and Standards

*Review:*

*Further Reading:*

Join EAD Listserv (Library of Congress): http://listserv.loc.gov/cgi-bin/wa?SUBED1=ead&A=1

EAD Help Pages from Society of American Archivists: http://www.archivists.org/saagroups/ead/

Dublin Core Metadata Initiative: http://dublincore.org/index.xml

OAIster (search engine for OAI-harvested metadata): http://www.oaister.org

Text Encoding Initiative (TEI): http://www.tei-c.org/index.xml
Reflection Questions:

Many different metadata standards and structuring devices exist for a variety of purposes. Why would you want to adopt a standard metadata schema?

3/25 – Digital Rights Management

Further Reading:

Reflection Questions:

Besek (2003) outlines the copyright issues relevant to the creation of a digital archive. What are the issues? Given what she says about copyright, what do you think the implications are for an oral history digital archive (like the Dance project)? Are there other digital rights issues other than copyright that we should be paying attention to?

4/1 – Personal Digital Archiving

Design Project Proposals due.

Review:

Reflection Questions:

Walker (2011) discusses the growing interest individuals have in their digital afterlife, and discusses some projects and their implications for this emerging area. Marshall (2008) discusses some challenges to personal digital archiving, and offers some strategies for overcoming these challenges.

Given the number of issues presented here (and there are many), what problem do you think is greatest facing personal digital archiving, and what do you think a possible solution to it may be? Does Marshall have it right? Or does one of the solutions that Walker mentions make more sense?

Have you had any digital preservation challenges in your past experiences (e.g., unable to access digital content) and what were they?

4/8 – Archiving Visual Media

Further Reading:

Reflection Questions:

What are some of the choices that a digitization project has to make? What affects the answers if you are scanning:

- a famous manuscript (e.g. the Declaration of Independence)
- large collections of manuscripts (e.g. the papers of some Senator)
- printed 18th or 19th century books
- recent printed material
- flat works of art (paintings, posters, ....).

Technical Question: A collection of 96,000 4 X 5-inch transparencies is scanned at 400 dpi, 24-bit color, and then losslessly compressed at a 1.3:1 ratio. Calculate the cost of hard disk storage (at .75 cents/GB) needed for this collection.

4/15 – Digital Preservation

Further Reading:

Archive.org: http://archive.org/about/

Reflection Questions:

This week's reading discusses the idea of a trusted digital repository and the attributes that should make up such a repository. Are there aspects that you find essential, superfluous, or surprising?
4/22 - Web Archiving

Further Reading:

Reflection Question:

This week’s reading discusses web archiving. Masanès (2006) discusses why the web should be archived and preserved, and the primary methods for capturing the web. Giving the arguments he provides, do you think libraries and archives should be archiving the web?

4/29 – Digital Archives in Teaching and Learning

Further Reading:

Reflection Questions:

Teaching and learning is the cornerstone of our K-12 education system, and one of the most important components of our higher education system. Many archives and libraries are beginning to realize that one way to increase their visibility and impact is to better connect themselves with a teaching and learning mission. What are some strategies to do this, as described by Robyns (2001) and Krause (2010)?

Do you have any teaching experience (either K-12 or higher education)? Have you ever used primary sources in your teaching? Do you think archives should be investing more time and energy in teaching or learning, or are they better off doing other tasks, such as archival management, or working on the “move to digital”?

5/6 – Design Project Presentations

Textbooks, Readings, and Materials
No textbook is required for this course. All readings are available online via the LMS (http://lms.pratt.edu).

**Course Requirements**

Students’ course grades will be determined by performance on the following activities:

1. Class Participation (20%)
2. Weekly Responses (20%) – 11 responses required over the course of the semester
3. Digital Archive Creation Project (25%)
4. Design Project (25%)
   4a. Proposal (2-5 pages) (5%) – due April 1
   4b. Design Document (5-10 pages) (15%) – due May 6, last day of class
   4c. Presentation (5%) – present on May 6, last day of class
5. Self-assessment (10%) – due May 6, last day of class

**Class Participation**

Students are expected to be prepared and to contribute to class discussions each week with scholarly analyses and insights. In addition, each week one student or a team of two students will present their perspective on the topic of the readings for the week. This is an opportunity to consolidate your (or your team’s) understanding on a topic, to present your perspective, to make novel connections to other domains, and to relate the readings to real-world experience. Presenters may use the essential questions posed (available on the LMS) to guide their presentations, or may choose their own direction in discussing the readings. Presenters should be prepared to make around a 10-minute presentation, and conclude with some questions or issues they would like to discuss more thoroughly. Remember that everyone in the class has read the week’s readings, so it should not simply be a summarization of what we have already read.

The schedule of presenters will be decided on the first day of class.

**Weekly Responses**

Each week, students are expected to write at least two paragraphs that reflect on the readings. Reflections can be in response to the essential questions posted on the LMS. Students responses should be posed on the LMS by 2pm (at the latest) on the day of class (late responses will receive a reduced grade). Please do not bring in a hard-copy or email unless the LMS is unavailable. The purpose of these responses is to allow students the opportunity to reflect on the readings and share their reflections with the other members of the class. Students are encouraged to read the responses by their fellow classmates (this is, however, not a requirement). Based on interests, students may choose two weeks NOT to do a weekly response. This means by the end of the semester, each student should have posted 11 responses.

Please note that the instructor will refer to these responses during class discussion and may ask students to further clarify or expand on their response.

**Digital Archive Creation Project (DACP)**

The objective of the Projects in Digital Archives course is to provide students with the theoretical, practical and hands-on experience in digital archive creation. In order to provide the most relevant and realistic learning experience for students, students will digitize an actual archival collection and develop the means of access to that collection through creating a web-presence.
We will be working with dance critic Barbara Newman to complete and enhance an oral history archive around dance. Ms. Newman has interviewed dance choreographers, company directors, master teachers, among others, and has published these interviews in her books, such as *Striking a Balance: Dancers Talk About Dancing* (Houghton Mifflin, 1982), *Grace Under Pressure: Passing Dance Through Time* (Limelight, 2004), and in periodicals like *Dancing Times* of the UK [http://www.dancing-times.co.uk/]. Many of the interviews have survived on audiocassette and mini disc, and some have been digitized by past semesters of this course. This archive includes interviews from notable members of the dance community such as Peter Martins (Ballet Master in Chief, NYC Ballet), Tanaquil LeClercq (wife of George Balanchine and NYC Ballet), and Moira Shearer (*The Red Shoes*).

The goal of this project is to bring together these separate digital archives into a single digital archive of dance interviews, and include a new set of interviews available on mini disc. The existing archives completed by past classes that will be merged are available at:

http://dancersondance.prattsils.org - Interviews from *Striking a Balance*

http://dance.prattsils.org - Interviews from the *Dancing Times* of the UK

Students will be placed in groups based on interests to carrying-out the project:

- **Research and Documentation:** Research the cutting edge in digital archiving; bring ideas and research to enrich the collection; providing any auxiliary materials (photos, research materials) that could augment the experience.
- **Metadata and Documentation:** Develop a metadata plan; import digital materials into the CMS; provide documentation and rights information for all digital resources.
- **Technology:** Responsible for setting-up and installing the Content Management System, working with the design team to integrate the design.
- **Design:** Responsible for designing the look and feel of the site (graphics, colors, user experience, usability).

More information on this project will be made available as the course progresses.

**Design Project**

**Overview**

Each day, the web expands with new web pages, tweets, status updates, videos, files, links, among many other types of contributions. With the deluge of new information, a challenge associated with contributing any primary source materials to the web is making it meaningful to users. Relatedly, what constitutes a “digital archive” is continually evolving (e.g., Twitter is now archived at the Library of Congress). Your challenge is to design your “ideal” project, tool, or program that could be used to accompany the digital archive being created for Barbara Newman or some other archiving area. Unlike that archive we will be creating, this project is more about designing—not fully implementing—some digital archiving idea you are interested in. You should consider the ways in which your project, tool or program makes the content interesting, relevant or useful to new or existing users.
The class will be divided into design groups; these are the same groups as for the Digital Archive Creation Project. Time will be provided in class for groups to meet; however, meeting out of class time may be required. Each group will be expected to deliver a project proposal, a project design document, and a presentation on the last day of class. Details on these aspects are below:

**Proposal**

The Proposal should be 2-5 pages and outline the idea for your project. The proposal should be considered a less fully-fleshed-out version of the project design document (see below). The instructor will provide feedback on the proposal which you can use in further refining your project.

**Design Document**

The project design document should be 5-10 pages, and can include figures and diagrams. This document should take the form of a traditional document (hence, it should not be a Powerpoint or in a presentation form). The design document should address:

a) What is the purpose of your project?

1) Why do we need it?
2) What materials will you use for this project?
3) What educational or learning goals will motivate this effort, if any?
4) What populations of users (if any) will be served?
5) What type of community (if any) will be fostered by this effort?
6) What role (if any) will librarians or archivists play in this project?
7) What will be the size of this effort?
8) What resources will be required?
9) How will the project be assessed?

b) What are the features and functions of the project? Please be specific.

c) Implementation: What do you think would be involved to make this design a reality? Provide estimations.

d) What does the literature and research on digital archives offer in thinking about this project?

**Presentation**

Each group will get 15 minutes to present, and a 5 minute question and answer period. Each group should:

a) Make it fun and educational! Be creative! We have all been subject to ill-prepared or low-energy presentations- avoid it!

b) Discuss the goals, why your project is needed, and what makes your project innovative.

c) Provide a way of demonstrating your design to the class. These may include electronic illustrations (Powerpoint), an interactive simulation, or large paper/drawing presentations. You may also want to consider handouts for the class.

**Self-Assessment**

In one or more pages, reflect on your contribution to the Digital Archive Creation Project (DACP) and the Design Project. What role did you play in each? What were your specific contributions? How would you rate your performance, and how does it compare to your fellow group members? Please submit by the end of the final class electronically via the LMS.
Assessment and Evaluation

1. All assignments must be completed in order to receive a passing grade in the course.
2. SILS is going green: assignments must be turned in electronically via the LMS. Late assignments will receive a reduced grade.
3. Late papers will receive a grade but no comments.
4. Pratt policy: Students with extensive absences (three or more for any reason) will be required to drop the course.

E-Portfolio

Starting Fall 2012, all students entering the MSLIS degree program are required to complete an e-portfolio that must be approved by their advisor before they will be permitted to graduate. The e-Portfolio provides students with an opportunity to showcase their best work from the courses they have taken at SILS, and an opportunity to demonstrate they have met the learning objectives of a Master of Information and Library Science.

Work completed for this course may be included in the e-portfolio. Students must demonstrate that their work fulfills at least one of the following learning outcomes:

1. Students carry-out and apply research
2. Students demonstrate excellent communication skills and create and convey content
3. Students use information technology and digital tools effectively
4. Students apply concepts related to use and users of information and user needs and perspectives
5. Students perform within the framework of professional practice

Detailed information on the learning outcomes, requirements and how to create your e-portfolio is available from: http://www.pratt.edu/academics/information_and_library_sciences/about_sils/sils_eportfolio/

Pratt’s grading scale:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Minimum Average</th>
</tr>
</thead>
<tbody>
<tr>
<td>Superior work:</td>
<td>A 4.0 (96-100)</td>
</tr>
<tr>
<td>Very good work:</td>
<td>A- 3.7 (90-95)</td>
</tr>
<tr>
<td>Marginally satisfactory:</td>
<td>B+ 3.3 (87-89)</td>
</tr>
<tr>
<td>Failed:</td>
<td>B 3.0 (83-86)</td>
</tr>
<tr>
<td></td>
<td>B-2.7 (80-82)</td>
</tr>
<tr>
<td></td>
<td>C+ 2.3 (77-79)</td>
</tr>
<tr>
<td></td>
<td>C 2.0</td>
</tr>
<tr>
<td></td>
<td>F 0.0 (0-69)</td>
</tr>
</tbody>
</table>

Policies

All Institute-wide policies are listed in the Bulletin under “Community Standards,” which include policies on attendance, academic integrity, plagiarism, computer, and network use. Students who require special accommodations for disabilities must obtain clearance from the Office of Disability Services at the beginning of the semester. They should contact Mai McDonald, Disability Services Coordinator, in the Office of the Vice President for Student Affairs, Main Building, Lower Level: 718-636-3711.
