LIS 665-01: Projects in Digital Archives

Summer A 2015

Class Hours: Mondays and Wednesdays 5:30 – 9:20p, May 18 to June 24, 2015

Office Hours: Mondays and Wednesdays 4:00-5:00p, and by appointment

Credits: 3

Prerequisites: LIS 654 (Information Technologies) and LIS 653 (Knowledge Organization), or by permission

Location: PMC 611

Bulletin Description:

This class is a combination of theoretical, practical and hands-on approaches to digital library creation. Topics will include metadata creation, image capture, archival storage and Web presentation. Students will learn about the theories behind the practices that they will implement, and will gain an understanding about the administrative issues associated with the successful implementation of a digitization project.

Detailed Description:

This course provides an opportunity for students to learn how to create a digital archive, and practice the implementation of such a digital archive with a partner institution. Additionally, students have the opportunity to exercise their creativity in the design of a tool, program, or project that makes use of digital archives for educational or social purposes.

Course Goals:

- Familiarize students with the current discourses in the area of digital archives, including theoretical and practical aspects.
- Introduce students to the digitization of audio and visual materials, and the handling of materials that are born digital.
- Learn about metadata and standards used in digital archive creation, as well as digital infrastructure.
- Anticipate managing digital archives in a time of technical change, including issues related in archiving the web, managing digital rights, and preserving digital content.

Student Learning Objectives:

- Students will be able to digitize analog material into digital form.
- Students will be able to create metadata for a digital archive.
- Students will be able to identify rights issues (legal, ethical, moral) with digitized materials.
- Students will be able to work with a team to design a digital archive using knowledge of information architecture and usability
- Students will be able to work with a team to implement a digital archive for a small institution using open source software.

Course Schedule and Readings

5/18 – Introduction

- Overview of Syllabus and Projects
- Assign topic presenters of class readings
- Post a photo of yourself and fill-out your profile on the LMS
- Sign-up for the Society of American Archivists (SAA) Listserv (do not have to be a dues-paying member); also, sign-up for any roundtable listservs that may be of interest.
<http://www2.archivists.org/listservs>

Doing Digital Archiving: The Practice of and its Challenges

Gilliland-Swetland, A. J. (2000). *Enduring Paradigm, New Opportunities: The Value of the Archival Perspective in the Digital Environment*. Washington D.C.: Council on Library and Information Resources. Retrieved from <http://www.clir.org/pubs/reports/pub89/pub89.pdf>.

Further Reading:

Gilliland, A. (2014). *Conceptualizing 21st Century Archives*. Chicago, IL: Society of American Archivists. Available from the PMC Library <http://cat.pratt.edu/record=b1217645~S0>

Blouin, F. X. Jr. & Rosenberg, W. G. (2011). *Introduction*. In *Processing the Past: Contesting Authority in History and the Archives*. New York: Oxford UP. Retrieved from course e-reserves. Also available from PC Library <http://cat.pratt.edu/record=b1188250~S0>

Roe, K. (2005). *Arranging & describing archives & manuscripts*. Chicago, IL: Society of American Archivists. Available from the PMC Library <http://cat.pratt.edu/record=b1156442~S0>

Cohen, D. J. & Rosenzweig, R. (2005). *Digital History: A Guide to Gathering, Preserving, and Presenting the Past on the Web*. Philadelphia, PA: University of Pennsylvania Press. Retrieved from <http://chnm.gmu.edu/digitalhistory/>

Reflection Questions:

Gilliland-Swetland (2000) discusses the use of the “archival perspective” in thinking through the movement of resources to the digital information environment. What is the “archival perspective,” and how is it useful (or not) in thinking about the digital information environment?

5/20 – Digitizing Audiovisual Media for Archival Purposes

Wheeler, J., Brothers, P. & Frost, H.(2007). *AMIA Videotape Preservation Fact Sheets*. Retrieved from course e-reserves.

Reside, D. File Not Found: Rarity in the Age of Digital Plenty. (2014). *RBM: A Journal of Rare Books, Manuscripts, and Cultural Heritage*, 15(1), 68-74. Retrieved from course e-reserves.

Goldman, B. (2011). Bridging the Gap: Taking Practical Steps Toward Managing Born-Digital Collections in Manuscript Repositories. *RBM: A Journal of Rare Books, Manuscripts, and Cultural Heritage* 12(1), 11-24. Retrieved from course e-reserves.

Reflection Questions:

Very quickly, the world has moved from the intellectual production of physical stuff (hand-written manuscripts, typewritten manuscripts, print-outs, etc.) to one of virtual objects (e.g., MS Word document that may never be printed out, a shared Google document, etc.). The challenge for archives is to try to create a primary source record, when all the tools of the trade and ways of doing things are changing and/or need to be changed. How do we create a primary source record in this environment, and how are people in the field responding to this challenge? How would you respond to it?

Digital Forensics for Archives

Gengenbach, M. J. (2012). *“The Way We Do it Here”: Mapping Digital Forensics Workflows in Collecting Institutions*. Unpublished Masters Thesis, University of North Carolina, Chapel Hill. Retrieved from <http://digitalcurationexchange.org/system/files/gengenbach-forensic-workflows-2012.pdf>

Further Reading:

Riley, J. & Shepherd, K. (2009). A Brave New World: Archivists and Shareable Descriptive Metadata. *The American Archivist*, 72 (Spring/Summer 2009). Retrieved from course e-reserves.

Reflection Questions:

Many different metadata standards and structuring devices exist for a variety of purposes. Why would you want to adopt a standard metadata schema? Which standards are exclusively for archives, and which are shared with related fields (such as libraries)?

6/3- Digital Infrastructure: From Storage to Content Management Systems

[On Storage] Simply Storage: RAID - <http://www.dell.com/us/business/p/d/videos~en/Documents~simply-storage-raid.aspx.aspx>

Staples, T., Wayland, R. & Payette, S. (2003). The Fedora Project: An Open-source Digital Object Repository Management System. *D-Lib Magazine*, 9(4). Retrieved from <http://www.dlib.org/dlib/april03/staples/04staples.html>

Reflection Questions:

This week we will be discussing digital infrastructure, from storage to content management systems (CMS). There is a video on RAID storage, a discussion of the latest developments in Archival management systems, and a discussion of cloud computing—which involves the outsourcing of these components to third parties. Do you have any experiences working with one of these components?

Digital Preservation

[Read entire chapter- use next button] Cohen, D. J. & Rosenzweig, R. (2005). Designing for the History Web. In *Digital History: A Guide to Gathering, Preserving, and Presenting the Past on the Web*.

Philadelphia, PA: University of Pennsylvania Press. Retrieved from <http://chnm.gmu.edu/digitalhistory/designing/>

Norman, D. (1988). Affordances. In *The Psychology of Everyday Things*. New York: Basic. Retrieved from course e-reserves.

Yakel, E. (2011). Who Represents the Past? Archives, Records, and the Social Web. In Terry Cook (Ed.), *Controlling the Past: Documenting Society and Institutions*. Chicago: Society of American Archivists. Retrieved from course e-reserves.

Reflection Questions:

This week we will be discussing user interfaces to digital archives. A variety of approaches are discussed in the readings with respect to designing a user interface, such as a Web 2.0 approach and social media components (Cocciolo, 2010; Theimer, 2010). With respect to the readings, discuss a user interface that you love OR hate (preferably one in an archival setting). Why does it provoke such feelings of love or hate?

6/10 - Rights Management

Besek, J. M. (2003). *Copyright Issues Relevant to the Creation of a Digital Archive: A Preliminary Assessment*. Washington D.C.: Council on Library and Information Resources. Retrieved from <http://www.clir.org/pubs/reports/pub112/pub112.pdf>

Hirtle, P. B. (2013). Copyright term and the public domain in the United States, January 1, 2013. Retrieved from <http://copyright.cornell.edu/resources/publicdomain.cfm>.

Behrnd-Klodt, Menzi L. (2008). *Navigating legal issues in archives*. Chicago, IL: Society of American Archivists. Available from the PMC Library <http://cat.pratt.edu/record=b1185880~S0>

Crews, K. (2012). *Copyright Law for Librarians and Educators: Creative Strategies and Practical Solutions*. Chicago, IL: ALA. Available from [PMC Library](#).

Cohen, D. J. & Rosenzweig, R. (2005). Owing the Past? In *Digital History: A Guide to Gathering, Preserving, and Presenting the Past on the Web*. Philadelphia, PA: University of Pennsylvania Press. Retrieved from <http://chnm.gmu.edu/digitalhistory/copyright> [Read entire chapter, use next button]

Carson, B. M. (2008). *The Law of Libraries and Archives*. Lanham, MD: Scarecrow Press. Available from PMC Library <http://cat.pratt.edu/record=b1135487~S0>

Reflection Questions:

Besek (2003) outlines the copyright issues relevant to the creation of a digital archive. What are the issues? Given what she says about copyright, what do you think the implications are for a project like the HCLE initiative?

6/15 – Digitizing Visual Media

Cornell University Library. (2003). *Moving Theory into Practice: Digital Imaging Tutorial*. Retrieved from <http://www.library.cornell.edu/preservation/tutorial/contents.html> [Read Sections 1-4 and 6]

Further Reading:

Library of Congress: Prints and Photography Division: Cataloging & Digitizing Toolbox:
<http://www.loc.gov/rr/print/cataloging.html>

Columbia University Libraries Digital Program Division. (2007). Scanning Lab Imaging Standards & Procedures. Retrieved from
<https://library.columbia.edu/content/librarywebsecure/bts/imaging.html>

National Archives. (2004). *Technical Guidelines for Digitizing Archival Materials for Electronic Access: Creation of Production Master Files - Raster Images*.
<http://www.archives.gov/preservation/technical/guidelines.html>

Digitization 101: <http://hurstassociates.blogspot.com/>
 Digitization in the Real World: <http://metroblogs.typepad.com/ditrw/>
 METRO Digitization LibGuide: <http://libguides.metro.org/digitization>

Reflection Questions:

What are some of the choices that a digitization project has to make? What affects the answers if you are scanning:

- a famous manuscript (e.g. the Declaration of Independence)
- large collections of manuscripts (e.g. the papers of some Senator)
- printed 18th or 19th century books
- recent printed material
- flat works of art (paintings, posters,).

Technical Question: A collection of 96,000 4 X 5-inch transparencies is scanned at 400 dpi, 24-bit color, and then losslessly compressed at a 1.3:1 ratio. Calculate the cost of hard disk storage (at .75 cents/GB) needed for this collection.

6/17 - Web Archiving

Masanès, J. (2006). Web Archiving: Issues and Methods. In J. Masanès (Ed.), *Web Archiving*. Berlin: Springer. Retrieved from course e-reserves.

Further Reading:

Roche, X. (2006). Copying Websites. In J. Masanès (Ed.), *Web Archiving*. Berlin: Springer. Retrieved from course e-reserves.

Brown, A.(2006). *Archiving websites: a practical guide for information management professionals*. London: Facet. Available from PMC Library <http://cat.pratt.edu/record=b1186505~S0>

Masanés, J.(2006).*Web Archiving*. Berlin: Springer. Available from PMC Library
<http://cat.pratt.edu/record=b1127549~S0>

Archive.org: <http://archive.org/about/>

Reflection Question:

This topic's reading discusses web archiving. Masanès (2006) discusses why the web should be archived and preserved, and the primary methods for capturing the web. Giving the arguments he provides, do you think libraries and archives should be archiving the web?

6/22 – Personal Digital Archiving

Walker, R. (2010, January 5). Cyberspace When You're Dead. *New York Times*, pp. MM30. Retrieved from <http://www.nytimes.com/2011/01/09/magazine/09Immortality-t.html?pagewanted=all>

Reflection Questions:

Walker (2011) discusses the growing interest individuals have in their digital afterlife, and discusses some projects and their implications for this emerging area. Marshall (2008) discusses some challenges to personal digital archiving, and offers some strategies for overcoming these challenges.

Given the number of issues presented here (and there are many), what problem do you think is greatest facing personal digital archiving, and what do you think a possible solution to it may be?

Have you had any digital preservation challenges in your past experiences (e.g., unable to access digital content) and what were they?

Reflection Questions:

Teaching and learning is the cornerstone of our K-12 education system, and one of the most important components of our higher education system. Many archives and libraries are beginning to realize that one way to increase their visibility and impact is to better connect themselves with a teaching and learning mission. What are some strategies to do this, as described by Robyns (2001) and Krause (2010)?

Do you have any teaching experience (either K-12 or higher education)? Have you ever used primary sources in your teaching? Do you think archives should be investing more time and energy in teaching or learning, or are they better off doing other tasks, such as archival management, or working on the “move to digital”?

Presentations

Textbooks, Readings, and Materials

No textbook is required for this course. All readings are available online via the LMS (<http://lms.pratt.edu>).

Course Requirements

Students' course grades will be determined by performance on the following activities:

1. Class Participation (20%)
2. Topic Reflections (20%) – 10 responses required over the course of the semester
3. Digital Archive Creation Project (50%)
 - 3a. Report on work completed (10-15 pages) (25%) – due last day of class
 - 3b. Presentation on work completed (25%) – due last day of class
5. Self-assessment (10%) – due last day of class

Class Participation

Students are expected to be prepared and to contribute to class discussions each week with scholarly analyses and insights. In addition, each week one student or a team of two students will present their

perspective on the topic of the readings for the week. This is an opportunity to consolidate your (or your team's) understanding on a topic, to present your perspective, to make novel connections to other domains, and to relate the readings to real-world experience. Presenters may use the essential questions posed (available on the LMS) to guide their presentations, or may choose their own direction in discussing the readings. Presenters should be prepared to make around a 10-minute presentation, and conclude with some questions or issues they would like to discuss more thoroughly. Remember that everyone in the class has read the week's readings, so it should not simply be a summarization of what we have already read.

The schedule of presenters will be decided on the first day of class. Please note that since this is an accelerated, 5-week course, no absences will be permitted.

Topic Reflections

For each topic, students are expected to write at least two paragraphs that reflect on the readings. Reflections can be in response to the reflection questions posted on the LMS. Students responses should be posed on the LMS by 5pm (at the latest) on the day of class (late responses will receive a reduced grade). Please do not bring in a hard-copy or email unless the LMS is unavailable. The purpose of these responses is to allow students the opportunity to reflect on the readings and share their reflections with the other members of the class. Students are encouraged to read the responses by their fellow classmates (this is, however, not a requirement). Based on interests, students may choose two topics NOT to do a response. Thus, by the end of the semester, each student should have posted 10 responses.

Please note that the instructor will refer to these responses during class discussion and may ask students to further clarify or expand on their response.

Digital Archive Creation Project (DACP)

The objective of the Projects in Digital Archives course is to provide students with the theoretical, practical and hands-on experience in digital archive creation. In order to provide the most relevant and realistic learning experience for students, students will digitize an actual archival collection (or integrate born-digital material) and develop the means of access to that collection through creating a web-presence.

This semester, we will be working with a selection of personal materials from Ms. Liza Loop. Ms. Loop is looking to create the History of Computing in Learning and Education (HCLE) Virtual Museum, and has worked her career in Silicon Valley's computing industry with an interest in uses of computing in education and learning. More information on the HCLE initiative can be found on the project's wiki: <http://hcle.wikispaces.com/>. The collection that we will be working with is both born-digital and analog: 5.25 floppy disk, 3.5 floppy disk, Hi8 video and Betamax video (which is the bulk). Our goal is re-animate these materials using methods relevant to a modern archival environment (e.g., digitizing analog material, imaging obsolete media, making it intelligible/runnable, etc.), and providing value to the HCLE initiative.

Students will be placed in groups based on interests to carrying-out the project:

- Curatorial: Curate the collection in a way that makes it meaningful to end-users. Create research materials around the collection and make it available to end-users online.
- Collection Control and Metadata: Develop a metadata schema; provide documentation and rights information for all objects; control the physical objects. Set standards for digitization.

Oregon Trail screenshot for Apple II by Minnesota Educational Computing Consortium (MECC). Although this game we will not be working with this semester, it is one of the more well known and often remembered educational games.

- **Design + Technology:** Responsible for setting-up, installation and maintenance of the Content Management System. Responsible for designing the look and feel of the site (graphics, colors, user experience, usability, user testing).

More information on this project will be made available as the course progresses.

Each group will submit a 10-15 page report detailing the work completed on the project. This report should highlight a) achievements and work completed in the project, b) challenges that have been overcome, as well as those that did not, c) discussion of decisions that you made (e.g., decisions based on something you read for class or some other resources, and cite as needed), and d) future directions for the project as perceived by project team. Be sure to include hyperlinks or evidence of work completed. The group will also present this report to the class on the final class.

Self-Assessment

In one or more pages, reflect on your contribution to the DACP. What role did you play in each? What were your specific contributions? How would you rate your performance, and how does it compare to your fellow group members? Please submit by the end of the final class electronically via the LMS.

Assessment and Evaluation

1. All assignments must be completed in order to receive a passing grade in the course
2. SILS is going green: assignments must be turned in electronically via the LMS. Late assignments will receive a reduced grade
4. Late papers will receive a grade but no comments

E-Portfolio

Starting Fall 2012, all students entering the MSLIS degree program are required to complete an e-portfolio that must be approved by their advisor before they will be permitted to graduate. The e-Portfolio provides students with an opportunity to showcase their best work from the courses they have taken at SILS, and an opportunity to demonstrate they have met the learning objectives of a Master of Information and Library Science.

Students must demonstrate that their work fulfills at least one of the following learning outcomes:

1. **Research** - Students carry-out and apply research
2. **Communication** - Students demonstrate excellent communication skills and create and convey content
3. **Technology** - Students use information technology and digital tools effectively
4. **User-Centered** - Students apply concepts related to use and users of information and user needs and perspectives
5. **Reflective Practice** - Students perform within the framework of professional practice

Detailed information on the learning outcomes, requirements and how to create your e-portfolio is available from: http://www.pratt.edu/academics/information_and_library_sciences/about_sils/sils_eportfolio/

Work completed in this class may satisfy one or more program-level learning objectives. Please speak with your instructor for assistance on how your group's work can be used in your e-portfolio.

Pratt's grading scale:

Superior work: A 4.0 (96-100) A- 3.7 (90-95)

Very good work:	B+ 3.3 (87-89)	B 3.0 (83-86)	B-2.7 (80-82)
Marginally satisfactory:	C+ 2.3 (77-79)	C 2.0	
Failed:	F 0.0 (0-69)		

Policies

All Institute-wide policies are listed in the Bulletin under “Community Standards,” which include policies on attendance, academic integrity, plagiarism, computer, and network use. Students who require special accommodations for disabilities must obtain clearance from the Office of Disability Services at the beginning of the semester. They should contact Mai McDonald, Disability Services Coordinator, in the Office of the Vice President for Student Affairs, Main Building, Lower Level: 718-636-3711.

Notes on Research, Archiving and Photographs

1. Students taking this class may be asked to participate in faculty-sponsored research for advancing knowledge in the field of Information and Library Science. This research will exclude any personally identifiable information. If you object to this practice, please communicate with the instructor at the beginning of the semester.
2. Student work may be retained by Pratt SILS and disseminated, including through electronic networks (e.g., repositories, websites). Students retain intellectual property rights on their work but Pratt has the right to use and display your work (for more information see Pratt’s Intellectual Property Policy available at: http://www.pratt.edu/provost/Final_Approved_by_BOT_Effective_01-01-08.pdf)
3. Students in the class may be photographed during class related activities. Photographs may be archived in institutional archives or websites. Photographs may be name tagged. If you object to being included in such photographs, please communicate with the instructor at the beginning of the semester.
